NON-EXPLOSIVE CANS

For storing and proper handling of all volatile explosive liquids, such as gasoline, naphtha, benzine, turpentine, ammonia, alcohol, rigoline, ether, etc. Fool proof.

The opening of the can is provided with an automatic valve, which makes it airtight, preventing evaporation of the liquid. Should the can be exposed to extreme heat, generating excessive gas pressure, the valve opens automatically, permitting the gas to escape and closes with reduced pressure. Cast brass nozzle.
